

# SINE Isochronic Entrainer

## Mac OS X Help

The Mac version of SINE is still experimental and nowhere near as tested as the Windows and GNU/Linux versions, therefore, issues can occur.

### **How do I install SINE?**

Drag the icon into the Applications drawer.

You can install SINE and SINE Editor separately if you want.

### **I downloaded a Preset file and when I open it, nothing happens**

The system broke the file association. To fix it, you have to run SINE, then while it's open, double click the preset file from Finder; this will recreate the file association.

Other apps, and the system itself, might break it again.

### **I found an issue. Where can I report it?**

Send an email to [dossenus91@gmail.com](mailto:dossenus91@gmail.com), or report the issue on [Github](#).
